		Repair DH403951 30 Diemer Dr Media PA Date of service 11/9/21 Technician John Simons Arrived on site to find DH403951 in alarm and running continuously. Removed the pump from Station and found the station was completely full of grease. Informed the customer the grease cannot go down the drains. Called Hickman Sanitation out to Site and they evacuated the station. Determined that the switches were corroded and the control clip was bad as well as the stater worn. The motor megged ok. Replaced the switches, control clip, stater and cutter wheel. Returned pump to station and tested from Alarm and it operates properly. Job complete Note: top right LSH screw stripped and broke. There are three screws holding the LSH together. Pressurized the assembly and it held with no leaks.
