		Repair DH507245 2217 East Deerfield Drive Media PA Arrived on site to find panel in Alarm and locked out in overpressure. Performed meter test and all readings are correct. Turned breakers off in panel and then turned back on. The pump turned on and amperage climbed to 10 in a matter of five seconds. Released DH507245 from the discharge manifold and cycled in station at 5.5 A. Opened ball valve and had air and blow back which was pressure buildup in line. Called Kevin from Township and he came out to Site. Verified that the shut off valve at the street was open. Kevin requested that we shut the power off to the station and he will contact the Necessary people to repair a line. Turned power off and reinstalled pump. Job complete
