		Repair DH510070 230 Dogwood Rd Media Date of service 12/22/21 Technician John Simons Arrived on site to find that the alarm and reset. Spoke with customer and he said that they were running the dishwasher and doing laundry and showers which is when the alarm sounded. Suspect that the Pump was overwhelmed with the water use. The customer came out and silenced it with the light stayed on for most of the night. Had customer turn on two sinks and a tub and cycled DH510070 at least ten times without any issues. Performed meter test and all readings were correct. Removed pump from station and found a little grease in wet well which could have blocked the sensing column. Inspected the switches and they looked brand new. Inspected the control clip and it had double red jumpers. Rewired the control clip with single jumper. Verified both sensing columns were clear. Returned the pump to station and had customer run water. Cycled the pump several times. The system is operating properly. Job complete Informed the customer that grease should not go down the sinks.
