		Repair DH469173 81 Paxon Hollow Rd Media Date of service 1/10/22 Technician John Simons Arrived on site to find panel indicating over pressure. Performed meter test and found all readings to be OK. Removed the pump from Station and found that it was jammed with wipes and feminine products. The station also had non-sewerable items in it. Informed the customer that these items should not be flushed down the toilet. Called Hickman Sanitation out to Site and they evacuated the station. Inspected the switches on pump DH469173 And found that they were corroded. Verified that the control clip and motor are both OK. Removed cutter wheel and un-jammed the pump. Found that the cutter wheel had worn teeth and the stater was worn. Replaced the switches, cutter wheel, and stater. Had customer run two sinks and a tub and tested pump from Alarm. System is operating properly. Job complete
