1	Service/Ins	Repair DH401795  1910 Colt Rd Media  Arrived on site to find DH401795 running continuously and in alarm. Performed meter test and all readings are correct. Noticed that the lid was partially buried in dirt and Station will need a 6 inch riser. We will need to return and install riser. Removed the lid and pulled pump from Station. Inspected the switches and found that they were corroded. Inspected the control clip and performed Meg test on motor and both were good. Removed lower suction housing and found that the stator had torn and seperated in two pieces.  NOTE: when removing stator a hissing sound came from the seal area like air was leaking. Temperature outside is 32 but the pump was hot from running continuously. The seal is also the old style. Replaced the stator and cutter wheel due the teeth being worn. Returned the pump to station and turned the power back on. The station went into alarm and cleared. The Pump cycled and shut off. Job complete  Returned to site 02/09/22 and installed a 6" riser. Job complete  Service Call & Inspection Fee <	150.00	150.00
