		Repair DH387294 390 Sycamore Mills Rd Media PA 19063  Date of service 2/16/22 Technician John Simons  Arrived on site to find that the panel indicated a run dry and had gone into Alarm. Perform meter testing all readings are correct. Removed DH387294 from the station and inspected the switches and control clip. Found that the switches were corroded and the control clip was the old style, double red jumper. Performed meg test and all readings were correct. Verified the stater is good. Replaced the switches and control clip. Also replaced the cutter wheel due to the teeth being worn. Returned the pump to station and tested from Alarm. While the pump was running I heard it start making noise like it was grinding on something and then jammed. Had to pull the pump again from the station and found a broken piece of clean out cap and a ball of feminine products jammed in the pump. Verified that there is nothing else in the station and unjammed the pump. Returned the pump to station and tested. The station pumped out of Alarm and the pump cycled and shut off. Job complete
