| | | Repair DH511466 Spoke with customer who happened to work for the Township and he said the alarm sounded for about a minute and then shut off. Had the customer run water and the pump never went into alarm and cycled several times, which is what it would normally do. The station was installed in November 2021. Removed the pump from Station and inspected the switches and the rivet points has slight corrosion on them. Replaced both switches and verified that the control clip worked properly. Returned the pump to Station and tested from Alarm. The alarm reset and the pump cycled and shut off. Job complete | | |
