		DNR DH390122. New Twp pump DH808787 1224 Hunt Club Lane Media, PA 19063 Date of service 8/31/22 Technician Dylan Rearick Dh390122 Station in alarm and not running. Pernod thermals out and indicates failed controls. Installed spare and successfully pumped out station, bringing core back to shop for full inspection. ESTIMATE: 09/13/22 Perform meter test on DH390122 and found shorts to ground from pins one and three indicating that the capacitor on control clip had leaked. Removed top housing and inspected the switches and found that they were corroded. Removed control cover and found that the capacitor had exploded and the contactor was burnt. Performed Megan test on motor and it failed on every wire. Removed ground screw and turned the motor on its side and no water came out indicating that the mechanical seal did not fail. The cutter wheel also has no teeth on it. Due to the age of the pump this will most likely be a DNR and replaced with new Township core. 9/14/22 Installed dh808787 and collected spare, job complete.
