Meter checks correct for flooded station and pump being called to run. Pulled Dh433492 and found it clogged with non-sewerable linens and cottons. Cleaned out station and found only a small amount more of nonsewerable material. Inspection of pump found stator and cutter wheel worn out. Switches corroded and motor controls burnt. Testing motor and it is still in good working order. Replaced parts and reinstalled pump in station and pumped out. Job complete.
