		Replace DH420931 with new pump DH869968 Reed Domer-Shank (Upper Prov) 15 West Bishop Hollow Road Media, PA 19063 Date of service 11/6/23 Technician John Simons Arrived on site to find panel indicating high level and normal but the pump was not running. Performed meter test and found that the contactor coil in pump had failed, both switches were closed and the pump had proper voltage. Also found no shorts to ground. Removed the lid and found that the station is a 129/93 and water was above the pump about 3 feet. Removed DH420931 from the station and decided to put in a new pump due to the age of the pump and the cost of repairs. This pump would require new switches, control clip, stator and cutter wheel. Installed new core as a Township core DH869968. Tested the pump from alarm and the alarm sounded. Turned on the pump breakers and the pump operates at 5.7 amps. Once the alarm cleared, the pump finished its cycle and shut off. Job complete
