		Replace Dh557362 with new pump DH869944  Eugene Riordan (Upper Prov) 317 Woodland Avenue Media, PA 19063  Date of service 11/9/23 Technician Brandon Mauro  Arrived on site to find pump DH557362 indicating alarm and running continuously. Pump was running very low amps and was very loud. Did meter readings and found shorts the ground for L1 and L2. Also, the control bracket reading was wrong. Pop the lid off station and found it was flooded. Removed pump from station and found the stator was completely worn. Both switches were corroded heavily. The cutter wheel has very little teeth left. Bearings of pump were shot and noisy. Control housing of pump was very corroded and rusted. With age of pump and needing a full rebuild, pump was replaced with a new core DH869944. Tested new pump for multiple cycles. New pump runs 5.7 amps and alarm functions properly. Cable good and 9512 board was in good shape. There were no non flushables in station. ** No pumps in upper Prov shed, so I used one I had from our shop that needs		

**OK TO PAY  
KEVIN MATSON, PE,
