1	Service/Ins	Replace DH506132 with new twp pump DH880424 Mark Lunden (Upper Prov) 103 Wilton Woods Ln Media, Pennsylvania 19063-1842 Date of service 3/4/24 Technician John Simons Arrived on site to find panel not in alarm. Performed meter test and readings were correct. the panel, started to chirp intermittently right in front of me. Removed the lid to Station and pulled DH506132 and found that the cutter wheel has no teeth. The switches are corroded and the control cover is deteriorating. The control bracket is the older style. This pump was manufactured in 2014. Due to the cost of the repairs and the age of the pump, installed new Township core DH880424 and tested from alarm. The alarm sounded properly. Turned on the pump breakers and the pump runs at 5.8 amps. Once the alarm cleared the pump finished its cycle and shut off. Job complete
