Customer had shut off the alarm breaker to panel once I flipped the breaker on the panel went straight to alarm. Performed meter readings and all readings to pump were good except switches and I wasn't getting any amp draws to pump. I pulled pump DH496332 and saw that pump was from 9/2014 I went to upper Prov shed to grab customer new core DH00923303. I put new core into station and ran pump to alarm. I had customer run water so I can run pump to its normal cycle. Amps on new core is 5.8 amps.
