Technician Sebastian Gonzalez

Arrived in site to find panel in alarm. Performed meter readings and all readings to pump were bad except voltage to pump and panel 240V I wasn't getting any amp draws when I tried to bump pump. I pulled pump DH431445 and saw that tag said pump was from 02/2012 I went to upper Prov shed to grab customer new core #DH00923304. I put new core into station and ran pump to alarm. And had customer run water so I can run pump to its normal cycle. Performed my last meter readings and everything checked out good.
