		Replace DH486360 with new twp pump DH934040 Stephanie Farrel 20 Indian Spring Rd Media PA 19063 Date of service 2/18/25 Technician Sebastian Gonzalez Arrived on site to find panel not in alarm but the red light on panel was just blinking turning on and off. Reseted the breakers in panel and then pump and panel both kicked on. My guess was the panel had lost power which is why the panel was turning off and on. Performed meter readings and all readings to pump were good except switches and amps on pump were running on 4.8/5.0 amps. I pulled DH486360 and saw that pump was from 12/2011 I went to upper Prov shed to grab customer new core DH00934040 once I installed new pump I ran pump to alarm. And I also had customer run water so I can run pump to its normal cycle. Amps on new pump is 5.8 amps
