|            |           | Replace DH429429 with new twp pump DH934082<br><br>James Tillilie (Upper Prov)<br>241 Foxcatcher Lane<br>Media, PA 19063<br><br>Date of service<br>Technician Sebastian Gonzalez<br><br>Arrived on site to find panel not in alarm. But alarm breaker to panel was turned off. Once I flipped the breaker on the panel still didn't go into alarm. Performed meter readings and all readings to pump were bad. Switches giving off high numbers. I wasn't getting any amp draws. Lifted up lid to station to find station over flowing and EQDs were disconnected and sitting in the water. I pulled pump DH429429 and saw that pump was from 1/2012 went to upper Prov shed to grab customer new core DH00934082. Before installing new core into station I megged the cables to panel and readings came back bad. I informed Scott about the situation and I installed a temporary cable 150'. I also replaced the contactor in panel due to it making a loud buzz noise. Once I ran new temporary cable I installed new core into station and ran pump out of alarm. Performed my last |           |          |            |         |
