		Replace A139313 with new pump DH934044 Alex Shaffer (Upper Prov) 1021 N Ridley Creek Rd Media, Pennsylvania 19063-2231 Date of service 3/2/25: Technician Nick Butkewicz Arrived on site and saw the panel and pump station in the front of the house. This property is in Upper Providence Township. I noticed the panel was not in alarm and the pump was not running. I talked with the homeowner who advised the alarm came on when his wife was in the shower and eventually shutoff. He did silence it though. I performed my meter checks and found them to be normal. I manually ran the pump and it ran at 5.6 Amps. Voltage was fine at 236 volts. I popped the lid and saw an old 2000 series pump. I pulled pump# A139313 and brought to my truck. The pump was almost 25 years old so I put a new pump in for them. I put pump# DH00934044 in the station and I also put an EQD in but left the original insert. I tested the pump and it cycled through and shutoff. Pump ran at 6 Amps. Job Complete
