I performed meter readings and all readings to pump and panel were good. Switches were good. Pump also had a MCB that the readings were .074. Lifted lid to station and saw that station wasn't flooded and pump was brand new just got installed 11/2024 I replaced contactor with a new one and humming stopped. I also had customer run water so I can cycle pump to alarm and it's normal cycle both times everything checked out good
