		Repair DH826079 Austin Seraphin (Upper Prov) 521 Gilbert St Media, Pennsylvania 19063-1311 Arrived on site to find panel not in alarm. Performed meter readings and all readings to pump were good. Switches were reading closed amps were running on 5.8 amps only issue on found was shorts to ground from all wires. Pulled apart eqd and saw that it was flooded and it was smoking. Megged cable wires in panel and readings came back bad. I cut back a few feet to cable and re megged cable wires and readings came back good. Broke down pump and saw that switches were corroded and sensing columns were missing 2 screws that hold them in. Replaced with screws from new WH core I have in my truck. Megged motor and readings came back good. Also ohmed motor and readings also came back good. Pump had a McB that was in great shape performed capacitor test and readings came back good. Stator on pump was in great shape. Before installing pump back into station i had to replace both Male/Female 6 pin inserts. Once I completed that I installed pump back into station ran pump to alarm. And I also had customer run water for me
