		Replace A137733 with new twp pump DH00942277 Tony Sabtelli 630 S Ridley Creek Rd Media PA 19063 Date of service 4/24/25 Technician Sebastian Gonzalez Arrived on site to find panel not in alarm. Performed meter readings and all readings to pump were bad. Switches were giving off high numbers amps on pump were running on 4.2 amps. Lifted lid to station to find station partially flooded. And I also saw customer had an 2K pump inside station went to bump pump and pumps bearings sounded really loud. Went to upper Prov shed to grab customer new core DH00942277. I pulled pump A137733. Installed new core into station and I also replaced EQD with new 1224. Once I finished everything and installed pump I had customer run water that wasn't reaching the station customer informed me that they were having back ups inside shop toilet and sinks were backing up. I wasn't able to test pump I also informed Scott about the situation. I also megged cables in panel and readings came back good. Amps on pump is running on 5.8 amps.
