		DH00914923 Craig Gratton 60 Diemer Dr Media PA 19063 Date of service 4/24/25 Technician Sebastian Gonzalez Arrived on site to find panel not in alarm. Performed meter readings and all readings to pump were good switches were reading closed and amps on pump were running on 5.8 amps. Upon further inspection I noticed that the contactor in panel kept clicking from open to closed. I also noticed that there was a broken piece on PCB. Also the neutral wire on board was completely stuck wasn't able to unscrew it I replaced with new PCB and contactor stoped clicking from opened to closed and I also megged cables in panel and readings came back good. I also pulled pump and checked everything from switches to MCB and stator and everything checked out good megged motor wires once again and readings came back good. Repaired pump and ran pump to alarm and I had customer run water and everything checked out good.
