		Replace DH557234 with new twp pump DH921725 515 Idlewild cir Date of service 12/26/24 Technician Sebastian Gonzalez Arrived on site to find panel in alarm. Performed meter readings and all readings to pump were bad except voltage from pump to panel. Switches on pump were giving off high numbers. I wasn't getting any amp draws. I pulled pump DH557234 and saw that pump was from 09/2014 I went to upper Prov shed to grab customer new core DH00921725. I put new core into station and ran pump to alarm. And I also had customer run water so I can run pump to its normal cycle. Both times pump pumped everything down correctly. Job complete
