Performed meter readings and all readings to pump were Bad. Switches to pump were giving off high numbers. I also wasn't getting any amp draws to pump. Lifted up lid to station to find station flooded and over flowing pulled pump DH550314 and saw that pump was from 03/2013 I went to upper Prov shed to grab customer new core DH00942216 before installing new core into station I put pump outside of station and went to panel to meg cables in panel and readings came back fine. I installed pump into station and was able to run pump out of alarm. Customer was able to run water for me so I can run pump to its normal cycle and both times everything checked out good.
