		Replace DH386051 with new twp pump DH00952636 Trish Rodriguez (Upper Prov) 10 Sycamore Court Media, PA 19063 Date of service 7/5/25 Technician Nick Butkewicz Arrived on site and found the panel and station on the left side of the house. The panel has a plastic cover over it with 2 rocks holding it down. I noticed a pretty good size whole in the top of the panel. The alarm breaker was off so nothing was on. I flipped the breaker on and the alarm went off and the pump was running at 5.7 Amps. I performed my meter checks and they were normal. I opened the lid to the tank and it had a few inches of water in it. As soon as I unlocked the pump the tank filled up with water. I pull pump# DH386051 and brought it to my truck. The pump is 15 years old so I installed a new pump for them, pump# DH00952636. I turned the pump on and it cycled through then shutoff. Pump ran 6.2 Amps. Job complete Note: I grabbed the new pump from Upper Providence's
