		Replace 2k pump with new twp pump DH00952203  Virginia Ray (Upper Prov) 600 Rosemary Ln Media, Pennsylvania 19063-2238  Date of service 7/15/25 Technician Sebastian Gonzalez  Arrived on site to find panel in alarm. Performed meter readings and all readings to pump were bad. Switches giving off high numbers and I wasn't getting any amp draws. I opened up lid to station to find station flooded. I saw that customer had an old 2K series pump. No serial number or serial number written in station. I went to upper Prov shed to grab customer new core DH00952203 and before installing core I went to panel to meg cables and all readings were good. Went back to station to install core and was able to run pump in and out of alarm. And I was able to run pump into its normal cycle. Amps on new pump 5.6
