I performed meter readings and all meter readings were bad except voltage from pump to panel. Switches to pump were giving me high numbers. I also checked amps on pump and I wasn't getting any readings when I was trying to use the Manuel run button. I opened up the lid to station and saw that the station was flooded. I pulled pump #DH421307 out of station and saw that pump was from 10/2011. I went to the upper Prov shed to grab customer new pump #DH00904016. I put new pump into station and ran pump to alalm. I also performed my last meter readings and everything checked out good. Job completed</div></div>	170.00	170.00
