Performed meter readings and all readings were good except switches to pump readings were really high. I pulled pump DH512269 and checked switches and switches were badly corroded I replaced with new ones. I also megged motor to pump and readings came back good. I also noticed that pump had old/burnt out contact coil I replaced with new MCB. I also checked stator and stator was a bit swollen I replaced with new one. Once I repaired pump I put pump into station and ran pump to alarm.
